

CARBURETOR CLEANER

It is a formulation of high cleaning power solvents. The carburetor cleaner is indicated to restore the operation of the carburetors, without the need to disassemble it and helps to keep the system clean. Its powerful cleaning agents remove varnish and deposit build-up, approved by leaders in automotive manufacturing, it does not damage the electronic sensors of new vehicles (Oxygen Sensor). Improves engine performance by allowing total fuel combustion.

USES

Ideal for carburetor components, automatic shutoffs, crankcase breather components, Exhaust Gas Recycling (EGR) valves and temperature control valves and fuel systems.

PROPERTIES

- Efficient cleaning power, quickly dissolves carburetor dirt deposits.
- Removes rubbers, varnishes, lacquers, resins, paraffins, tar and gasoline. High affinity for carbonaceous residues and sediments in general.
- Reduces hydrocarbon emissions and controls pollution from cars that do not have a catalytic converter.

- Ensures better fuel economy

HEALTH AND SAFETY

Highly toxic product by inhalation and ingestion. In case of skin contact, wash with plenty of water. Keep out of the reach of children. Flammable product, store in ventilated places and away from incompatible materials and sources of ignition

AVAILABLE SIZES

CARBURETOR CLEANER
10 oz. jar.
12 ounce jar
